STRETCHING IN THE BED

The arm chest press

1. The first step is to lie on your back with your arms extended straight out in front of you.

2. Then, lift your arms up towards your head, keeping your elbows close to your body.

3. Hold this position for a few seconds, then lower your arms back down.

4. Repeat this exercise several times, and you'll be able to stretch your arms and chest.

5. This is a great exercise for people who are sitting at a desk all day long.

6. It's also a good idea to do this exercise before you go to bed.

7. This will help you to wake up feeling refreshed and energized.

8. So, if you're looking for a simple way to stretch your arms and chest, this is the perfect exercise.
